CUSTOMIZE YOUR CURRICULUM FROM THE COURSES BELOW, OR HAVE US MAKE A CUSTOM ONE FOR YOU OR YOUR TEAM

Choose Course Areas:

- Basic Prostate Cancer Physiology
- Markers and Genomic Testing
- Screening and Early Detection
- Chemotherapy
- Current Research
- Immunotherapy
- Advanced Cancer Treatment Layering
- BioStatistics and Epidemiology Overview
- Localized Prostate Cancer Treatment
- Androgen Deprivation Therapy

Choose Ad Ons:

- Pre-evaluation
- Journal Club
- Live Training

Choose Modules:

- Therapeutic layering of the advanced prostate cancer drugs: RADAR II
- The Prostate: The Most Diseased Organ in the Male Body
- Active Surveillance Updates in Brachytherapy +EBRT +SBRT
- Diet/Supplements and Exercise
- Updates in Radiation Oncology: Of Brachytherapy and Beams
- New Concepts in Androgen Deprivation Therapy(ADT)

- New Concepts in Androgen Deprivation Therapy (ADT)
- MRI in the Management of Prostate Cancer:
 - What the Urologist Needs to Know
 - Targeting Androgen Receptor in CRPC
- What's New in Immunotherapy
- Bone Metastases and Mortality
- Intermittent HT, Quality of Life, and Testosterone Recovery
- Breakthroughs with Biomarkers and Risk in Prostate Cancer and Genetics & Genomics
 - Genomic Markers: Who to Biopsy
 - Genomic Markers: Who to Re-Biopsy
 - Genomic Markers: Who to Treat
 - Non Genomic Markers for Early Diagnosis and Prognosis Prevention of Prostate Cancer
- Association of Benign Prostatic Hyperplasia(BPH) and Over Active Bladder(OAB)
- Testosterone, the FDA, and CVD Risk Controversies
- ED and the Detection of Subclinical CVD
- Point-Counterpoint: Testosterone Replacement Therapy (TRT) Is Safe and Effective
- Sexual and Urinary Health After Treatment of Prostate Cancer
- Germline and Somatic DNA Repair Defects in Prostate Cancer
- Recent Advances for Renal Cell Carcinoma
- Cancer Survivorship
- Point-Counterpoint: Early Chemotherapy is better for newly diagnosed metastatic Prostate Cancer
